

UX CASE STUDY

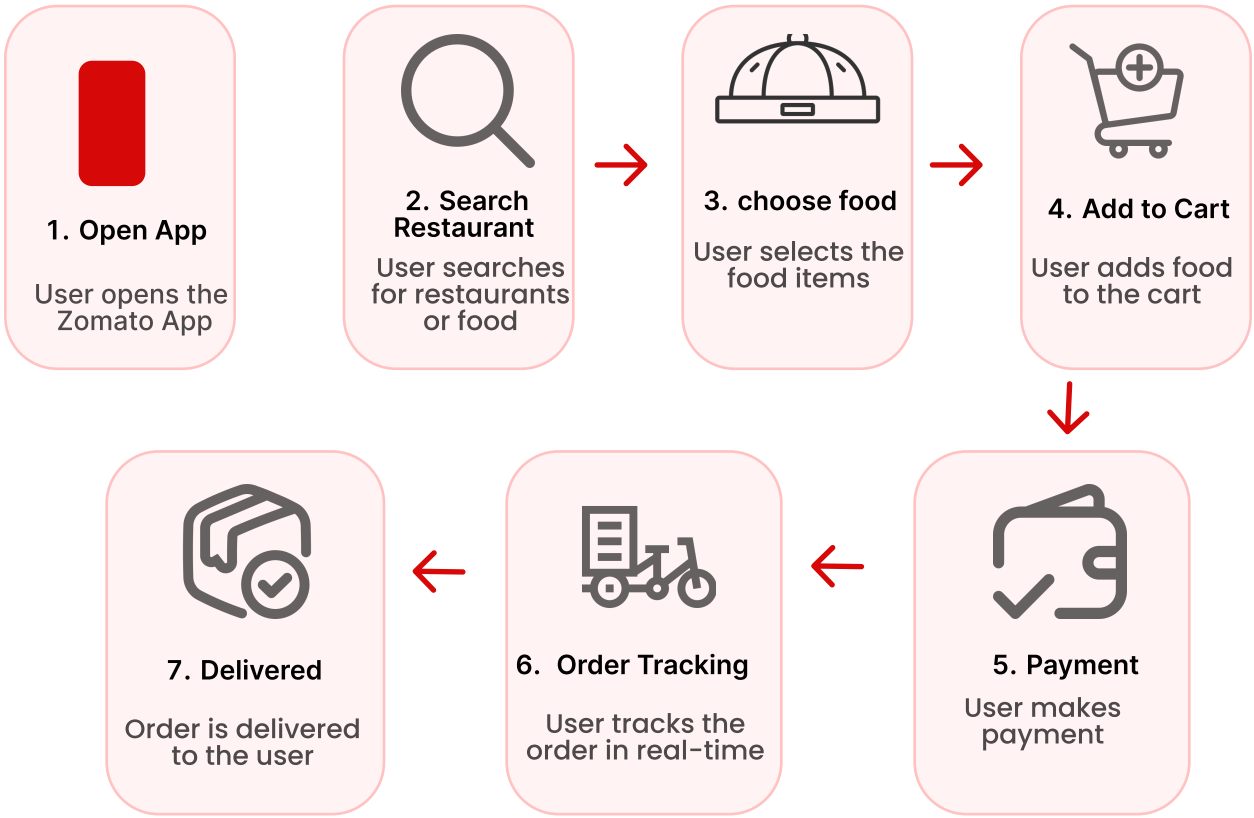

App: Zomato

Prepared by:
Gittiqa kumari

2. USER JOURNEY

This is the typical user journey when ordering food on Zomato.

3. STRENGTHS & WEAKNESSES

STRENGTHS

- 1. Easy Navigation
the app is simple and easy to use.
- 2. Fast Search
quick search gives accurate results.
- 3. Attractive Food Images
high-quality images attract users.
- 4. Live Order Tracking
real-time tracking builds trust.
- 5. Secure Payment
multiple secure payment options are available.

WEAKNESSES

- 1. Too Many Promotional Banners
Too Many Banners On The Home Screen.
- 2. Filters Are Confusing
filters are difficult for first-time users.
- 3. Restaurant Pages Look Crowded
some restaurant pages contain too much information.
- 4. Checkout Process Has Multiple Steps
the checkout process takes longer because of multiple steps.

4. IMPROVEMENTS

Improvement 1

Cleaner Home Screen

Reduce clutter and focus on what matters most

Improvement 2

Simple Filters

Make filters easy to understand and quick to apply

Improvement 3

Faster Checkout

Reduce the number of steps to complete the order.

Current Checkout Flow

Suggested Checkout Flow

5. CONCLUSION

“ Great food. Great experience.”

zomato is easy to use and helps users order food quickly. the app has a clean design, fast search, and live order tracking, making the overall experience smooth.

however, the home screen has too many banners, the filters can be confusing, and the checkout process takes a few extra steps. making these features simpler would improve the user experience.

Overall UX Rating

4.5 / 5
